PROFESSIONAL EXPERIENCE

Solution Architect & Technical Lead · Fedro Software SRL

Jan 2025 — Present

Cagliari, Italy

Lead architect and developer of SPRocket (AI-powered phone-call analysis) and SprocketLive (real-time module for live AI assistance to call-center operators). From zero to production in 3 months.

- Production metrics: 2,000+ audio hours/month, 2 enterprise tenants, 99.9% uptime, 100+ files processed in parallel.
- Clean/DDD/CQRS architecture on ABP.io with isolated multi-tenancy, granular RBAC and database-driven job-centric configuration.
- Provider-agnostic multi-LLM AI pipeline (Azure OpenAI, Anthropic Claude, Assembly.AI, ElevenLabs) for transcription, semantic analysis and JSON Schema structured outputs, with an automated Suggestion Evaluator for continuous prompt QA.
- SprocketLive — real-time AI assistance for call-center operators: live transcription and multi-agent orchestration (director-follower with sales-phase specialized agents), instant push via SignalR and Testing Player for session replay.
- Asterisk PBX integration via ARI/WebSocket + non-intrusive dual-channel RTP capture (snoop bridge); event-driven with MassTransit for error isolation and parallel processing.
- Production deployment for a B2C enterprise client (energy/fiber sector): end-to-end GDPR enforcement and a structured KB of validated scenarios as authoritative source.
- Real-time Angular frontend with Elasticsearch full-text search and AG-Grid reporting; +50% performance gains via multi-level caching, query tuning and circuit breakers.
